Crepidoma		
Reconstruction		
Used sources	Drawing_nr_3 Drawing_nr_15 Drawing_nr_16 Report_nr_1_Pages25-26 Report_nr_2_Pages9- 12+60	<complex-block></complex-block>
Uncertainty	Several preserved marble ashlars of the euthynteria and the lowest step. No fragments of the second step and the stylobate are preserved or can be assigned to the temple any more	З
Argumentation	On the basis of the preserve well as the masons' letters,	ed building stones and the traces of toolmarks, as the crepidoma can be reconstructed

Columns		
Reconstruction		
Used sources	Drawing_nr_1 Drawing_nr_2 Drawing_nr_3 Drawing_nr_4 Photo_nr_10 Report_nr_1_Page20-24 Report_nr_2_Page12-16	
Uncertainty	Finds of several column fragments that can give information about the original shape	3/4
Argumentation	Preserved fragments as w sufficient reconstruction.	ell as comparisons with the Hephaisteion allow a

Column Ring		
Reconstruction		
Used sources	Drawing_nr_5 Drawing_nr_17 Report_nr_1_Pages2+9+13-24	
Uncertainty	Dinsmoor's calculations based on the construction dimensions and comparisons (Report_nr_1)	2
Argumentation	The dimensions of the foundation and t of a 6x13 column temple. These constru- building blocks, mason's letters and reco comparisons with the Hephaisteion, ten of Nemesis in Rhamnus allow an exact c	he crepidoma allow a reconstruction action dimensions, fragments of construction of the columns as well as nple of Poseidon in Sunion and temple calculation of the placement.

Anta Columns		
Reconstruction		
Used sources	Report_nr_1_Page26-27	
Uncertainty	Assumption cannot be backed up by finds	2
Argumentation	Based on comparisons, it is assumed that the column otherwise identical) than the columns of the outer ri of reduction is hypothetical.	ns must be smaller (but ng. However, the factor

Anta Capital		
Reconstruction		
Used sources	Drawing_nr_4 Drawing_nr_5 Report_nr_1_Page39+44 Report_nr_2_Pages36-37	f_{ATT} f_{A
Uncertainty	two fragments that provide information about the shape	3 / 2
Argumentation	From the remaining fragments and comparisons with the Hephaisteion, the shape and course can be reconstructed (drawing_nr_5)	

Architrave		
Reconstruction		
Used sources	Drawing_nr_4 Drawing_nr_18 Report_nr_1 _Pages27-29 Report_nr_2_Page16+20+56-60	
Uncertainty	Four fragments are extant	Fa it. Browl (seen drong) for theth.
Argumentation	The extant fragments of the archi (regulae, triglyphs) allow a recons	trave as well as the architectural elements truction of the dimensions and shape.

Taenia and Metopes		
Reconstruction		
Used sources	Drawing_nr_6 Report_nr_1_Pages27-29 Report_nr_2_Pages20-22+60	ABIS ABIS ABIS ABIS ABIS ABIS ABIS ABIS
Uncertainty	Four fragments of the metopes could be recovered; the taenia is also recognisable on these fragments	3/4
Argumentation	Mason letters on several fragme of the triglyphs allow a reliable a taenia. A possible relief of the m	ents as well as correspondence with fragments assignment as metopes with subsequent etopes is not recognizable.

Triglyphs		
Reconstruction		
Used Soures	Drawing_nr_6 Drawing_nr_7 Photo_nr_2 Photo_nr_3 Report_nr_1_Pages11- 12+27-29 Report_nr_1_Pages28-29 Report_nr_2_Pages16-20	<image/>
Uncertainty	Several well preserved fragments	4
Argumentation	Reconstruction is based on other architectural element	the preserved fragments and accordance with the ts (metopes, regulae).

Mutules		
Reconstruction		
Used sources	Drawing_nr_4 Drawing_nr_9 Drawing_nr_14 Photo_nr_5 Report_nr_1_Pages11-12+27-29 Report_nr_2_Pages16-20+23-24	<figure></figure>
Uncertainty	Several preserved fragments that give information about the original shape	4
Argumentation	Reconstruction is based on the pres other architectural elements (trigly	served fragments and accordance with the phs, metopes, regulae).

Roof		
Reconstruction		
Used sources	Drawing_nr_4 Report_nr_2_Page28	
Uncertainty		3
Argumentation	The other construction co the reconstructed roof sh	mponents (sima, geison and raking geison) result in ape.

Roof Tiles		
Reconstruction		
Used sources	Drawing_nr_10 Drawing_nr_11 Drawing_nr_12 Report_nr_2_Page28 Article_nr_3_Page230	<image/>
Uncertainty	Three extant fragments of the roof tiles	3 /2
Argumentation	The preserved fragments an structure from that. Howev corresponding reconstructi	re too fragmentary to be able to deduce the er, a comparison with the Hehaisteion allows a on.

Water Spouts		
Reconstruction		
Used sources	Photo_nr_7 Photo_nr_8 Report_nr_1_Pages 32+35-37	<image/>
Uncertainty	Extant fragments + preserved depiction on a sherd from antiquity	4
Argumentation	On the basis of the lionhead-waterspouts that can be attributed to the temple of Ares, as well as the depiction on a sherd from a crater, the lion waterspouts can be reconstructed along the broadsides.
